

Create a new Database and import Tables (with their Data)

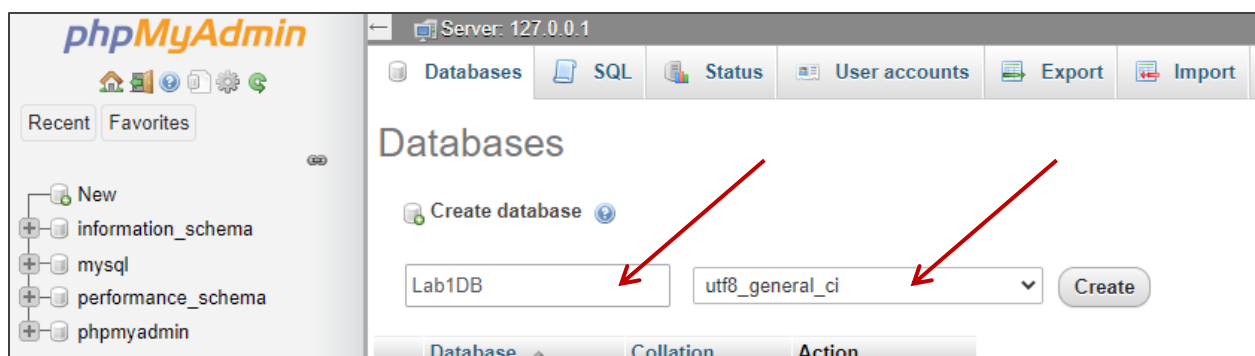

1. Start Control Panel and Enable MySQL and Apache (PHP) Server

Then, Open a **Web Browser**, type <http://localhost> and Visit **phpMyAdmin** Web Page (top right corner)

2. Create a Database

- Specify Database Name (e.g., Lab1DB) and character setting (e.g., utf8_general_ci)

3. Import Tables (with their Data)

- Select Export SQL File (i.e., the one that creates DB Tables and insert Rows) (e.g., lab1db.sql)
